

Seed Drop-Off Procedures

- **Step 1:** Find your nearest drop-off site by visiting www.growingnative.org.
- **Step 2:** If you do not have a breathable bag, transfer your seed to the white mesh bags provided. Be sure to place each different species in its own bag. Do not include debris—except for one leaf and stem for identification purposes—in the bags.
- **Step 3:** Fill out one identification tag per bag. This information is very important to the nurserymen.
- **Step 4:** Tie the tag securely to the bag.
- **Step 5:** Put the seed bag in the drop-off box.
- **Step 6:** If you are a group leader, fill out and submit your site tracking form and a survey.
- **Step 7:** Let us know how your seed collection went by submitting a testimonial and a survey, both of which you can find on www.growingnative.org.

If there are no bags or tags at the drop-off site, please call the *Growing Native* coordinator at 301.608.1188 x211.
